 Project: Fullstack Blog Application

Tech Stack: React.js, Node.js, Express.js, MongoDBAtlas, TailwindCSS

Description:

Developed a full-fledged blogging platform where users can register, log in, create, update, and delete their blogs. Admins have additional privileges to manage users and content. JWT-based authentication and cookie-based sessions are implemented for secure login. Images are uploaded and stored using Cloudinary.

Key Features:

- User Authentication (JWT + Cookies)
- Blog CRUD (Create, Read, Update, Delete)
- File/image upload via Cloudinary
- Role-based access (Admin/User)
- Protected routes using middleware
- Responsive UI using React
- RESTful APIs built using Express.js
- MongoDB for scalable data storage
